Mr. Frazer Lockhart
Department of Energy
P.O. Box 928
Golden, CO 80402

Dear Mr. Lockhart:

EPA has reviewed the final Past Remedy Report for Operable Unit 3. While this document is a substantial improvement over the draft version and most of the comments (both written and oral) previously transmitted have been addressed adequately, there are a few remaining inconsistencies and miscalculations which need to be corrected. These items are indicated in our enclosed comments (Enclosure 1) and comments from the Colorado Department of Health (CDH) (Enclosure 2). Although we do not expect that the modifications indicated in the enclosed comments will affect the conclusions of the report, we believe that because this document is the first document pertaining to the off site areas to be finalized, it is essential that it is accurate and technically correct. EPA cannot approve the final Past Remedy Report until the enclosed comments are addressed to our satisfaction.

Please make the necessary modifications and resubmit the applicable sections of the report no later than May 24, 1991, for approval determination by EPA. Furthermore, it is our understanding that discussions regarding the site conceptual model will continue throughout the development of the remedial investigation workplan for this operable unit. If you require clarification of any of the enclosed comments, please contact Ms. Bonita Lavelle of EPA at (303) 294-1165, or Mr. Joe Schieffelin of CDH at (303) 331-4421.

Sincerely,

Martin Hestmark
